If we are unable to commission our new manufacturing unit in a timely manner or without cost overruns, it may adversely affect our business, results of operations and financial condition.***

In addition to our existing manufacturing unit, we are in the process of setting up two additional manufacturing units for dyeing of fabrics (“**Dyeing Unit**”) which shall be located at Navsari District, Surat, Gujarat and for manufacturing bags (“**Bag Unit**”), which shall be located at Palsana, Surat. We propose to utilise an amount of ₹ 3,070.48 lakhs and ₹ 186.82 lakhs towards funding the capital expenditure of the Dyeing Unit and purchase of plant and machinery for the Bag Unit, respectively. Our expansion plan may be subject to delays and other risks, among other things, unforeseen engineering or technical problems, disputes with workers, force majeure events, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents. Additionally, we may face risks in commissioning the proposed units including but not limited to, delays in the construction of our proposed manufacturing units, problems with its facilities or for other reasons, our proposed manufacturing units do not function as efficiently as intended, or utilisation of the proposed units is not optimal, we may not be able to take additional orders to produce anticipated or desired revenue as planned any of which could result in delays, cost overruns or the termination of the projects.

In the event of any delay in the schedule of implementation or if we are unable to complete the project as per the scheduled time, it could lead to revenue loss. If our proposed projects are not commissioned at the scheduled time, our Company may face cash crunch. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. As a result our business, financial condition, results of operations and prospects could be materially and adversely affected. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 78 of this Draft Red Herring Prospectus.

- 2. As on date we have not obtained any of the approvals, clearances and permissions as may be required from the relevant authorities for the proposed manufacturing units. In the event we are unable to obtain such approvals and permits, our business, results of operations, cash flows and financial condition could be adversely affected.***

Our proposed manufacturing units will be located at Navsari and Palsana Districts, Surat, Gujarat. Our Company is yet to receive the approvals, clearances and permissions, which are required to be obtained from the relevant authorities, for setting up and running a manufacturing units in Gujarat. We are in the process of applying for the required approvals for the proposed manufacturing units. The completion and commissioning of the proposed manufacturing units is contingent upon the receipt of such approvals and we cannot assure you that the construction of our proposed manufacturing units, will be completed as scheduled, or will become operational as soon, or operate as efficiently, as planned.

We cannot assure you that we will be able to receive the approvals for the said manufacturing units in a timely manner. If we are not able to receive the required approvals at all or if there is a delay in receiving the same, all other operations, which are to be undertaken for the completion of the manufacturing units might also be delayed. This may cause the actual cost of construction to exceed the budgeted amounts due to a variety of factors such as construction delays, cost escalation of raw material, interest rates, labour costs, foreign exchange rates, regulatory and environmental factors, weather conditions and our financing needs. The quotations for plant and machinery and civil works received by us from various suppliers might expire and we may be compelled to purchase the same at a higher cost. Our financial condition, results of operations and liquidity would be materially and adversely affected if our project or construction costs materially exceed such budgeted amounts. For further details, please refer to chapters titled — “*Objects of the Issue*” and “*Government and other Approvals*” on pages 78 and 215, respectively of this Draft Red Herring Prospectus.

- 3. Our expansion into new product categories and an increase in the number of products offered by us may expose us to new challenges and more risks.***

Our Company is engaged in the business of manufacturing of technical textiles used in luggage, medical arch support, chairs, shoes and other products in the apparel industry. We intend to expand our business operations, we are proposing to expand our product portfolio by manufacturing bags. The proposed bag manufacturing unit is proposed to be set up on a plot of land admeasuring 498.98 sq. mtrs. located at Block No. 314, Plot No. 281-282, Rajhans

Texpa, NH-8, Baleshvar, Palsana, Surat – 394 317, Gujarat, India. Furthermore, we intend to utilise a portion of the Net Proceeds towards purchase of plant and machinery proposed to be installed at the said manufacturing unit. For further details, please see the chapter titled “*Objects of the Issue*” on page 78. Our limited experience with these products may expose us to new challenges which may in turn also impact our product mix and revenues in future. Therefore, our past results of operations should not be taken as indicative of our future performance. If we cannot successfully manage our product mix, address new challenges or compete effectively, we may not be able to recover costs of our investments and eventually achieve profitability, and our future results of operations and growth prospects may be materially and adversely affected.

4. *Our Company has a very limited operating history of dyeing operations, which will make it difficult for the investors to evaluate our historical performance or future prospects.*

Our Company since its incorporation has been engaged in the business of manufacturing of specialized technical textile includes weaving, coated, printing and finishing of grey fabric to produce finished knitted and woven fabrics used in luggage, medical arch support, chairs, shoes and apparels industry. As of date of this Draft Red Herring Prospectus, we outsource our dyeing operations to third parties and therefore do have very limited experience of undertaking dyeing operations. Since, we have a limited operating history of dyeing of fabrics, we may not have sufficient experience to address the risks related to undertaking the said operations.

Further, from the proceeds of this Issue, our Company endeavours to integrate our operations by setting up a separate unit for undertaking dyeing of fabrics. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 78 of this Draft Red Herring Prospectus. The dyeing industry is a separate segment of the textile industry in which we hold very limited experience in relation to such products; therefore, it could be very difficult for us to understand the nuances of undertaking such operations in the early stages. We may face difficulty in understanding the demand and supply patterns, fashion trends, marketing segments for such products which may pose a risk in the smooth operation, and working of our proposed manufacturing unit. In the event that we fail to understand the market operations and the risks related to the same, our business, financial performance and cash flows may be affected.

5. *We cannot assure that we shall be able to utilize our proposed manufacturing units to their full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition.*

A portion of the Net Proceeds is proposed to be utilised towards setting up of manufacturing units for undertaking dyeing operations and for manufacturing bags. We cannot assure that we shall be able to utilize our proposed manufacturing unit to their full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition. There cannot be any assurance that the proposed capacity would be utilized to its full extent.

6. *There can be no assurance that the objects of the Issue will be achieved within the time frame anticipated or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the plan for deployment of the Net Proceeds has not been appraised by any bank or financial institution.*

In addition to our existing manufacturing unit, we are in the process of setting up two additional manufacturing units for dyeing of fabrics (“**Dyeing Unit**”) which shall be located at Navsari District, Surat, Gujarat and for manufacturing bags (“**Bag Unit**”), which shall be located at Palsana, Surat. We propose to utilise an amount of ₹ 3,070.48 lakhs and ₹ 186.82 lakhs towards funding the capital expenditure of the Dyeing Unit and purchase of plant and machinery for the Bag Unit, respectively. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads under the setting up of the proposed manufacturing units, as disclosed in the section titled “*Objects of the Issue*” on page 78. Further, the plans for deployment of the Net Proceeds are in accordance with our management’s estimates and have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, and interest or exchange rate fluctuations and consequently its requirements may change.

In the event there is a shortfall in receipt of issue proceeds from this Issue, we may be unable to meet the equity requirement for the proposed manufacturing units which may have a bearing on the commission of our manufacturing units on time. In case of any shortfall of the proceeds raised from this Issue, there can be no assurance that we will be able to raise the funds through other sources to meet our obligations of meeting equity contribution for our proposed

units. In case of shortfall in the proceeds of this Issue which are to be utilized for meeting the objects of the Issue, the shortfall will be met by such means as are available to our Company at such future time and at the discretion of the management, including by way of cash available with us or by any other means permissible under law. We cannot assure that we will be able to arrange for adequate cash or will be able to procure further loans to meet the funding requirements. Any failure to meet the additional funding requirements will have a material adverse effect on the implementation of the proposed units.

We may also be required to adhere to certain restrictive covenants as regards raising of finance for the units from means other than those sanctioned under our present financing documents. Any failure or delay on our part to raise funds from the Issue or any shortfall in the Issue proceeds and subsequent inability of our Company to source alternate means of finance may delay the implementation of our project and could adversely affect our growth plans.

- 7. *Our Company is yet to place orders for 100% of the plant and machinery. Any delay in placing orders or procurement of such plant and machinery, may further delay the schedule of implementation and increase the cost of commissioning the manufacturing units.***

Our Company has received third party quotations for the plant and machinery required to be installed in the proposed manufacturing units, for details please refer to the chapter titled “*Objects of the Issue*” on page 78 of this Draft Red Herring Prospectus. Although, we have identified the type of plant and machinery to be purchased for the proposed manufacturing units, we are yet to place order for 100% of the plant and machinery. Further, the cost of the machineries is based on the quotations received from suppliers and such quotations are subject to change due to various factors such as, change in supplier of equipment, change in the government regulation and policies, change in management’s view of desirability of the current plans, possible cost overruns, etc. Since, we have not yet placed orders for the said plant and machinery we cannot assure that we will be able to procure the same in a timely manner and at the same price at which the quotations have been received. Delay in procurement of the same can cause time and cost overrun in the implementation of our proposed project and can also compel us to buy such machineries at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

- 8. *We highly depend on our Subsidiary, IGK Technical Textiles LLP for weaving, coating, sizing and embossing of specialized technical textile. Our inability to undertake the said operations in a timely manner, could adversely affect our operations, financial condition and/or profitability.***

We are engaged in the business of manufacturing of Technical Textiles for the luggage, medical arch support, chairs, shoes and apparels industry. Our Company specialised in converting yarn into fabric through knitting of fabrics. We outsource weaving, coating, sizing and embossing of specialized technical textile to our Subsidiary, IGK Technical Textiles LLP. Therefore, we are highly dependent upon our Subsidiary, IGK Technical Textile LLP for undertaking weaving, coating, sizing and embossing on specialized technical textile. We have not entered into formal agreement with our Subsidiary, which binds it to undertake the said operations on a timely basis for our Company. The terms of the operations and the cost of the operations undertaken is mutually decided between our Company and our Subsidiary. In the absence of such agreements, we cannot assure that our Subsidiary would fulfill its obligations or would not commit a breach of the understanding with us. Further, in the event that there are quality lapses in the weaving, coating, sizing and embossing operations undertaken by our Subsidiary, we may face product liability claims which could impact our image and reputation. In view of the lack of formal agreements, we may not be able to initiate claims relating the quality or receive refund for the amount spent by us from our Subsidiary. In the event that the weaving and other operations are not undertaken on a timely basis, we may not able to prosecute our Subsidiary due to lack of formal agreements. Further, our Subsidiary is not contractually bound to deal with us exclusively, which could adversely affect our business, results of operations and financial condition.

- 9. *We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

We are engaged in the business of manufacturing of Technical Textile for the luggage, medical arch support, chairs, shoes and apparels industry. Our business operations are highly dependent on our customers, and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these

significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, if there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

10. We highly depend on our raw materials and a few key suppliers who help us procure the same. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.

Our Company is engaged in the manufacturing of Technical Textile for the luggage, medical arch support, chairs, shoes and apparels industry and therefore we are highly dependent on yarn, which is the most important component in manufacturing our products. We are dependent on third party suppliers for unprocessed yarn which is the primary raw material used in the manufacture of our products. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all.

We have not entered into formal arrangements or contracts with third-party traders or mills from whom we procure our raw materials. We rely on pre-booking capacity with our suppliers, based on our demand projections. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Further, the amount of raw materials procured and the price at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, environmental factors and changes in government policies and regulations, including those relating to the textile industry in general. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

11. We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.

Our Company is engaged in the business of manufacturing woven and knitted fabrics for direct sale to various retailers, garment manufacturers, brands, traders and other intermediaries and manufacture products on job work basis. We manufacture a particular fabric on the basis of orders which are received from our customers which generally contain the specifications as per which the fabric has to be manufactured. We have not entered into any agreements, arrangement or any other understanding with our customers and therefore, our business is dependent upon the continuous relationship with the customers and the quality of our products. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, fashion trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

12. There are outstanding litigations involving our Company which, if determined adversely, may adversely affect our business and financial condition.

As on the date of this Draft Red Herring Prospectus, our Company is involved in certain legal proceedings. We cannot assure you that these legal proceedings will be decided in favour of our Company or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

A summary of the pending tax proceedings and other material litigations involving our Company is provided below:

13. Our Company does not have long-term agreement with suppliers for supply of raw material. Our inability to obtain raw material in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability.

We depend on a number of suppliers for procurement of raw materials required for manufacturing our products. Our Company maintains a list of registered and unregistered suppliers from whom we procure the materials on order basis. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

14. Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.

Our manufacturing unit is situated at Block No 314 Plot No 188, 189 and 190 Rajhans Texpa NH -8 Palsana, Surat – 394 317, Gujarat, India. In addition to our existing manufacturing unit, we are in the process of setting up two additional manufacturing units for dyeing of fabrics (“**Dyeing Unit**”) which shall be located at Navsari District, Surat, Gujarat and for manufacturing bags (“**Bag Unit**”), which shall be located at Palsana, Surat. We propose to utilise an amount of ₹ 3,070.48 lakhs and ₹ 186.82 lakhs towards funding the capital expenditure of the Dyeing Unit and purchase of plant and machinery for the Bag Unit, respectively. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current and proposed manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to

comply with the directives of relevant government authorities. In the event, we are forced to shut down our manufacturing units for a prolonged period; it would adversely affect our earnings, our other results of operations and our financial condition as a whole. Spiraling cost of living around our units may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness.

- 15. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.**

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control and quality assurance processes and regularly conduct inspections of raw materials sourced from suppliers which is based on our internal quality standards and the quality standards set by our customers. However, we cannot assure you that our quality control and quality assurance processes will not fail or the quality tests and inspections conducted by us will be accurate at all times. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality assurance procedures, negligence, human error or otherwise, may damage our products and result in deficient products. It is conducive for us to meet the international quality standards set by our international customers as deviation from the same can cause them to reject our products and can also cause damage to our reputation and market standing.

In the event the quality of our products is not in accordance with our standards or our products are defective, our customers may return our products and our reputation may suffer impact, which in turn may adversely affect our business, results of operations and financial condition. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

- 16. Failure to comply with the conditions applicable under Technology Upgradation Fund Scheme ("TUFs"), Amended Technology Upgradation Fund Scheme ("ATUFs") and Gujarat Textile Policy, 2012 being availed by us or withdrawal of the Schemes by the Government may render our Company ineligible for interest and capital subsidies.**

Our Company presently is eligible to avail benefits provided under TUFs, ATUFs and the Gujarat Textile Policy, 2012. These benefits include interest subsidy and reimbursement of SGST incurred by our Company. For further details, please refer to the chapter titled "Our Business" and "Key Industrial Regulations and Policies" on pages 110 and 127, respectively of this Draft Red Herring Prospectus. These benefits and incentive are provided to our Company on fulfilment of certain conditions and eligibility criteria, if we fail to comply with the conditions stipulated under these policies, our Company may be denied such subsidies, which in turn will make our operations less cost effective and increase the prices of our products. Further, termination of, withdrawal or variations in the terms of such policies can adversely affect our profitability and/or our business operations. As a result, it could have a material adverse effect on results of operations and financial condition of our Company.

- 17. If we are unable to anticipate and respond to changes in fashion trends and changing customer preferences in a timely and effective manner, we fail to maintain our reputation, brand value or increase the market for our products, the demand for our products may decline.**

A significant feature of the textile industry is the rapidly changing customer preferences and therefore, results of our operations are dependent on our ability to anticipate, gauge and respond to such changes in customer preferences and design new products or modify our existing products in lines with the changes in fashion trends as well as customer demands and preferences. If we are unable to respond to the changing customer preferences or fashion trends, or if we are unable to adapt to such changes by modifying our existing products or by launching new products as per the demand, we may significantly lose our market position and existing customer base which may adversely affect our results of operations and financial condition.

Maintaining and enhancing the recognition and reputation of our products is critical to our business and the competitiveness of our products. Many factors, some of which are beyond our control, are important for maintaining and enhancing our products, including maintaining or improving customer satisfaction and increasing the popularity of our products. In particular, we launch new products, and if any of those products do not meet standards for quality

or customers' expectations, our market standing, reputation and the sales of our products may be bear an impact. If we fail to maintain our reputation, or increase the market for our products, or the quality of our products declines, our business and prospects may be adversely affected.

18. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

19. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could adversely affect our business, results of operations and financial condition.*

We have experienced considerable growth over the past three years and we have expanded our operations and product portfolio. We cannot assure you that our growth strategies will continue to be successful or that we will be able to continue to expand further, or at the same rate. Our inability to execute our growth strategies in a timely manner or within budget estimates or our inability to meet the expectations of our customers and other stakeholders, could have an adverse effect on our business, results of operations and financial condition. Our future prospects will depend on our ability to grow our business and operations. The development of such future business could be affected by many factors, including general, political and economic conditions in India, government policies or strategies in respect of specific industries, prevailing interest rates and price of equipment and raw materials. Further, in order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively. Failure to manage growth effectively could adversely affect our business and results of operations.

20. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we majorly require our intermediaries to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers/ intermediaries. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers/ intermediaries. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Further, one of the objects of this Issue include funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see "*Objects of the Issue*" on page 78. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our

customers/ intermediaries, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our intermediaries may increase our working capital requirement. Further, if an intermediary defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers/ intermediaries. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

- 21. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.***

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

- 22. *We are subject to risks associated with rejection of our products consequential to defects, which could generate adverse publicity or adversely affect our business, results of operations or financial condition.***

Defects, if any, in our products could lead to rejection of supplied products and consequential replacement liability. In the event our Company fails to replace the defective products in a timely manner or at all, the same could consequently lead to a negative publicity of our brand thereby affecting our brand value, our business proposition, results of operations and/or financial condition.

Such defective products, if capable of being refinished, are sold by our Company as fresh finished fabrics and the products that cannot be refinished, are sold at a discounted price. We cannot assure you that no such claims will be

brought against us in the future or that such claims will be settled in our favour. Any such successful claims against us could adversely affect our results of operations. Management resources and attention could also be diverted away from our business towards defending such claims. Moreover, our Company might have to bear certain costs for handling such claims which could be filed for supplying defective products, which could increase our expenses and thereby affect our business, results of operations and financial condition.

23. Our Company does not have any documentary evidence for experience of some of our Directors.

For the brief profile some of our Directors, our Company was not able to obtain necessary documents for their past work experience, respectively and therefore has taken an affidavit from these Directors for the same. For further details, please refer to the chapter titled “Our Management” on page 139 of this Draft Red Herring Prospectus.

24. In the past, there have been instances of delays in filing of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to RoC.

In the past, there have been certain instances of delays in filing statutory forms as per the reporting requirements under the Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC. The instances of delay filing are as under:

SI No	Form	Date of Resolution	Date of Filing	Purpose
1	MGT 14	08-07-2023	08-08-2023	Bonus Issue
2	DIR 12	10-10-2023	21-11-2023	Appointment of Rashmi Bihani and Change in designation of Directors
3	DIR 12	10-10-2023	22-11-2023	Change in Designation of Radhe Shyam Daga

6	ADT 1	01-11-2023	02-12-2023	Appointment of Baid Agarwal & Singhi as Statutory Auditor

No show cause notice in respect to the above has been received by our Company till date and except as stated in this Draft Red Herring Prospectus, no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

25. Our application for renewal of certain licenses, approvals and registrations, which are required for our Company’s operations and business, are pending before the relevant authorities. Not receiving these licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company’s operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Our Company has made applications before the relevant authorities for renewal of some of the licenses, approvals and registrations that have expired which are pending before the relevant authorities. Further, there are certain licenses/approvals which we will be required to obtain from the relevant authorities for setting up our proposed manufacturing units for dyeing of fabrics and manufacturing bags as per the Objects of the Issue, which will be applied for at a later date. We cannot assure you that the relevant authorities will approve and provide us with such licenses, approvals and registrations for our new manufacturing unit or will renew such licenses, approvals and registrations, or if renewed would do so in a timely manner. Further, these licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company’s operations and may adversely affect our business. For further details on the licenses obtained by our Company, please refer to the chapter titled — “Government and Other Approvals” on page [•] of this Draft Red Herring Prospectus.

26. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.

Our Company's success largely depends on our brand name and brand image and our trademark is important for differentiating our Company's products from that of our competitors. Our current trademark and logo , is owned by our Company under the provisions of the Trademarks Act, 1999. Our trademark and logo may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs. There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapters titled "Our Business" and "Government and other Statutory Approvals" on pages 110 and 215, respectively of this Draft Red Herring Prospectus.

- 27. *We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers. Any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.***

Our success depends on the smooth and continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit or warehouses and transportation of our products from our units or warehouses to our end customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our end customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our end customers in an efficient and reliable manner could adversely affect our business, results of operations and financial condition.

- 28. *Our entire business operations are based out of a single manufacturing unit at Surat. Further, our manufacturing unit, our warehouses, godowns and all our facilities are currently located in one geographical area. The loss of, or shutdown of, our operations at this manufacturing or any disruption in the operation of our warehouses will adversely affect our business, financial condition and results of operations.***

Our manufacturing unit and all other facilities are based out of a single premise located in Surat, Gujarat. Accordingly, we rely exclusively on our facilities at this manufacturing unit to earn revenues, pay our operating expenses and service our debt obligations. Any significant interruption or loss or shutdown of operations at our manufacturing unit at Surat would adversely affect our business. Our manufacturing, processing, printing and other business activities may be subject to unexpected interruptions, including natural or man-made disasters. Our facilities and operations could be adversely affected by, among other factors, breakdown or failure of equipment, difficulties or delays in obtaining spare parts and equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, raw material shortages, fire, explosion and other unexpected industrial accidents and the need to comply with the directives of relevant government authorities.

Furthermore, any significant interruption to our operations directly or indirectly as a result of any industrial accidents, severe weather or other natural disasters could materially and severely affect our business, financial condition and results of operations. Similar adverse consequences could follow if war, or war-like situation were to prevail, terrorist attacks were to affect our related infrastructure, or if the Government of India were to temporarily take over the facility during a time of national emergency. In addition, any disruption in basic infrastructure, such as in the supply of electricity could substantially increase our manufacturing costs. Any disruption of our existing supply of infrastructure services such as power or water, our failure to obtain such additional supplies as required by us or an increase in the cost of such supplies may result in additional costs to us. In such situations, our production capacity may be materially and adversely impacted. In the event our facilities are forced to shut down for a significant period of time, our earnings, financial condition and results of operation would be materially and adversely affected.

All our facilities are located in our manufacturing unit. Any significant disruption, including social, political or economic factors or natural calamities or civil disruptions, impacting this region may adversely affect operations. Any failure of our systems or any shutdown of any of our manufacturing unit and facilities for any reason could result in significant increase of costs and delays in execution of orders. We do not have a diversified base of manufacturing

operations, and local disturbances which would have a material adverse effect on our business, and consequently on our operations and financial condition. Further, our warehouses are subject to operating risks, such as performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. Any disruption of operations of our warehouses could result in delayed delivery of our product, which in turn may lead to disputes and legal proceedings with them on account of any losses suffered by them or any interruption of their business operations due to such delay or defect. While our strategic objectives include geographical expansion across India, in the event that we are unable to make available our products in a prompt manner and within the requisite timelines our business, financial condition and prospects may be adversely affected.

29. *If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.*

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across raw material procurement, manufacturers, suppliers, warehouse management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

30. *We have significant power requirements for continuous running of our factories. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

Our manufacturing unit has significant electricity requirements and any interruption in power supply may temporarily disrupt our operations. Our manufacturing unit receives power supply from Dakshin Gujrat Vij Co. Limited. We do not have any alternative source of power supply and any disruption in the same would force us to halt our manufacturing processes until such disruption exists. The quantum and nature of the power requirement for running our manufacturing unit is such that it would be very cumbersome to substitute it with any other independent source of power supply. Since, we have a high power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in area from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “*Our Business- Power*” on page 123 of this Draft Red Herring Prospectus.

31. *Our industry is competitive and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The textile industry in India is fragmented and competitive with several regional brands and retailers present in local markets across the country. The textile market in India has historically been dominated by the unorganized sector. Our products compete with local retailers, non-branded products, economy brands and products of other established brands. Any increase in sale of such brands or if preference is given to such brands it may have an adverse impact on our business and results of operations. Some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices.

Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may

significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see “*Industry Overview*” on page 100 of this Draft Red Herring Prospectus.

32. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Directors and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 139, 151, 196 and 158, respectively of this Draft Red Herring Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

33. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●] % of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

34. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.*

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through book building mechanism. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” on page 67 of this Draft Red Herring Prospectus.

35. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

36. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of November 30, 2023, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “*Restated Financial Information*” at page 158.

While we believe that all our related party transactions have been conducted on an arm’s length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

37. *Our Promoters and members of our Promoter Group have extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.*

Our Promoters have extended certain personal guarantees in favour of certain banks / financial institutions with respect to various facilities availed by our Company from them. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If the guarantees is invoked or our manufacturing unit is foreclosed, the ability of our Company to continue its business operations could be adversely affected. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled “*Financial Indebtedness*” on page 196 of this Draft Red Herring Prospectus.

38. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 196 of this Draft Red Herring Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

39. *Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.*

Our Company has experienced negative net cash flow in operating and investing activities in the past, the details of which are provided below:

Particulars	(₹ in lacs)			
	November 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Net Cash Flow from/(used in) Operating Activities	(848.91)	(23.42)	41.37	273.54
Net cash generated from/(used in) investing activities	(780.92)	(1,100.19)	(1,172.82)	(233.45)
Net Cash Flow from/(used in) Financing Activities	1,648.59	1,152.29	1,088.51	9.30

*indicates positive cash flow.

We may incur negative cash flows in the future which could have a material adverse effect on our business, prospects, results of operations and financial condition.

40. In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “Financial Indebtedness” on page 196 of this Draft Red Herring Prospectus.

41. Some of the raw materials that we use are inflammable in nature. While we take adequate care and follow all relevant safety measures, there is a risk of fire and other accidents, at our manufacturing unit and warehouses. Any accidents is likely to result in loss of property of our Company and/or disruption in the manufacturing processes which may have a material adverse effect on our results of operations, cash flows and financial condition.

The key raw material used by us for manufacturing our products is yarn. Due to its combustible nature of yarn and the semi-finished or finished products manufactured by us, we might be exposed to fires or other industrial accidents. While our Company believes that it has necessary controls and processes in place, any failure of such systems, mishandling of hazardous chemicals or any adverse incident related to the use of these chemicals or otherwise during the manufacturing process or storage of products and certain raw materials, may cause industrial accidents, fire, loss of human life, damage to our and third-party property or cause environmental damage. If any industrial accident, loss of human life or environmental damage were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution. In addition to adversely affecting our reputation, any such accidents, may result in a loss of property of our Company and/or disruption in our manufacturing operations entirely, which may have a material adverse effect on our results of operations and financial condition. In addition to the loss as a result of such fire or industrial accident, any shutdown of any of our manufacturing units may result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition.

Further, any fire or industrial accident, any shutdown of our manufacturing units or any environmental damages will increase the regulatory scrutiny and result in enhanced compliance requirements including on use of materials and effluent treatment which would, amongst others, increase the cost of our operations. We cannot assure you that despite our best efforts we will not face similar situations at our manufacturing units which may result in significant loss to our Company and/or a disruption of our manufacturing operations. The loss incurred by our Company, though adequately insured, may or may not be recoverable through the insurance maintained by us. Such loss and/or

disruption of our manufacturing operations may have a material adverse effect on our operations, cash flows and financial condition.

- 42. *Our Company has extended corporate guarantee with respect to loan facilities availed by our Subsidiary, IGK Technical Textiles LLP. Any defaults committed by our Subsidiary or invocation of the guarantee extended by our Company may adversely affect our business operations and financial condition.***

Our Company has extended corporate guarantee in favour of ICICI Bank with respect to the loan facilities availed by our Subsidiary, IGK Technical Textiles LLP. In the event the business and operations of our Subsidiary deteriorates and if it commits a default in payment of principal or interest due to the bank, the corporate guarantee extended by our Company may get invoked.

On the occurrence of any of the above-mentioned situations, the Bank might demand repayment of the outstanding amounts under the said facilities sanctioned to our Subsidiary. In the event, we are unable to repay the outstanding amount in a timely manner or at all, the Bank may enforce the restrictive covenants or consequences of defaults which in turn may affect our further borrowing abilities thereby adversely affecting our business and operations. For further details, please refer to the chapter titled — “*Financial Indebtedness*” on page 196 of this DRHP.

- 43. *Our Subsidiary and our Associate may have conflicts of interest as they are engaged in similar business and may compete with us.***

Our Subsidiary and our Associate are engaged in the same industry segment as our Company. Although the product portfolio offered by our Associate differs from our Company, however there might be conflicts of interest in future. We have not entered into any non-compete agreements with our Subsidiary and our Associate and there can be no assurance that such entities will not compete with our existing business or any future business that we might undertake or that we will be able to suitably resolve such a conflict without an adverse effect on our business and financial performance.

- 44. *Any conflict of interest which may occur between our business and any other similar business activities pursued by our Promoters could have a material adverse effect on our business and results of operations.***

As of the date of this Draft Red Herring Prospectus, our Promoters are associated with entities which are engaged in business activities similar to our business, thereby causing a conflict of interest between our Company and our Promoters. We have not entered into a non-compete arrangement with him to address such conflicts. We cannot assure you that a conflict will not arise, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations.

- 45. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 78 of this Draft Red Herring Prospectus.

- 46. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their

inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 139 of this Draft Red Herring Prospectus.

47. *We may face difficulties in implementing our strategies including our expansion and diversification plans of entering new geographical areas, development and commercialization of new products.*

We may face difficulties in implementing our strategies including our expansion and diversification plans of entering into new geographical areas and development and setting up of new manufacturing unit due to various factors such as entry barriers, stringent rules and regulations, fierce competition in the new markets, inadequacy of funds for expansion, high cost of debt that may be required for expansion and diversification. Implementation of our strategies may pose significant challenges to our administrative, financial and operational resources and additional risks that our Company may not be able to foresee. Failure to successfully implement some or all of our key strategic initiatives in an effective and timely manner may adversely affect our future business prospects. For further details on our business strategies, kindly see the chapter titled “*Our Business*” beginning on page 110 of this Draft Red Herring Prospectus.

48. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than ₹ 10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

49. *Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.*

Our manufacturing unit is situated at Block No 314 Plot No 188, 189 and 190 Rajhans Texpa NH -8 Palsana, Surat – 394 317, Gujarat, India. In addition to our existing manufacturing unit, we are in the process of setting up two additional manufacturing units for dyeing of fabrics (“**Dyeing Unit**”) and for manufacturing bags (“**Bag Unit**”), which shall be located at Palsana, Surat. We propose to utilise an amount of ₹ 3,070.48 lakhs and ₹ 186.82 lakhs towards funding the capital expenditure of the Dyeing Unit and purchase of plant and machinery for the Bag Unit, respectively. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads under the setting up of the proposed manufacturing unit and purchase of machinery for our existing manufacturing unit, as disclosed in the section titled “*Objects of the Issue*” on page 78.

In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Draft Red Herring Prospectus. In terms of Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in the Draft Red Herring Prospectus, we cannot assure that we will be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoter would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue. Additionally, the requirement on Promoter to provide an exit opportunity to such dissenting shareholders may deter the Promoter from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the

Promoter of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

50. *The requirement of funds in relation to the objects of the Issue has not been appraised.*

We intend to use the proceeds of the Issue for the purposes described in the section titled "*Objects of the Issue*" on page 78. The objects of the Issue have not been appraised by any bank or financial institution. These are based on management estimates and current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

51. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, our Company has availed insurance policies to insure building, furniture and plant & machinery, floater stock, vehicle and workmen. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

52. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled "*Dividend Policy*" on page 157 of this Draft Red Herring Prospectus.

53. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

54. *We have not independently verified certain data in this Draft Red Herring Prospectus.*

We have not independently verified data from the industry and related data contained in this Draft Red Herring Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

55. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

56. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

57. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited due

to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 58. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.***

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

- 59. *The price of the Equity Shares may be highly volatile after the Issue.***

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

- 60. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.***

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI. However, SEBI pursuant to its circular bearing reference number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 has reduced the time taken for listing of specified securities after the closure of public issue to 3 working days (T+3 days) as against the present requirement of 6 working days (T+6 days); 'T' being issue closing date. The provisions of this circular were applicable, on voluntary basis for public issues opening on or after September 1, 2023 and on mandatory basis for public issues opening on or after December 1, 2023. Our Company shall close this Issue in accordance with the timeline provided under the aforementioned circular.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

- 61. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

- 62. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.***

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the textile sector;
- adverse media reports about us or the Indian textile sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

63. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

64. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of Equity Shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

65. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

66. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 (“**PDP Bill**”) was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India (“**MoEIT**”) has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

67. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our activities in India, our business activities and manufacturing unit is located in Ranchi, Jharkhand, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;

- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India's principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the textile markets.

68. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

69. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

70. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

71. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in textile markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

72. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall

or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

73. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

For further details on the method and procedure for Bidding, please see section entitled “**Issue Procedure**” on page 239 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Given the dynamic nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions competitive environment and interest or exchange rate fluctuations, changes in design and configuration of the proposed manufacturing units, increase in input costs of construction materials and labour costs, logistics and transport costs incremental preoperative expenses, taxes and duties, interest and finance charges, engineering procurement and construction costs, working capital margin, regulatory costs, environmental factors and other external factors which may not be within the control of our management. In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. Further, the plan for deployment of the Net Proceeds has not been appraised by any bank or financial institution” on page 29.

The fund requirements mentioned above for purchase of plant and equipment and civil works are based on the internal management estimates of our Company and quotation received from third parties, and have not been verified by the Book Running Lead Manager or appraised by any bank, financial institution. The fund requirements are based on current circumstances of our business and our Company may have to revise its estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations. Consequently, the fund requirements of our Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the Net Proceeds as stated above, our Company may re-allocate the Net Proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the Net Proceeds or cost overruns, our management may explore a range of options including utilising our internal accruals or seeking debt financing. For further details see “Risk Factors – Risk Factor 49 - Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus would be subject to certain compliance requirements,

GLOBAL ECONOMY

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia’s war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies.

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its pre-pandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below pre-pandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with pre-pandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below pre-pandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to pre-pandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes.

Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis. Divergences in labour market performance across regions broadly mirror those for output and consumption. Employment and labour participation rates are estimated to exceed pre-pandemic trends in advanced economies but to remain significantly below them in emerging market and developing economies, reflecting more severe output losses and much weaker social protection. Countries that had the most limited fiscal space are also those where employment shortfalls are the largest (ILO 2023). Among advanced economies, the euro area has seen larger employment gains than the United States. This may reflect more extensive use in the former of worker-retention programs modelled on the German Kurzarbeit short-time work scheme (IMF 2020), which protect workers’ income and allow businesses to retain firm-specific human capital, reducing the costly process of separation, rehiring, and training. In the euro area, these programs bolstered employment during the most challenging phases of the crisis and accelerated the recovery when economies reopened.

Investment, on the other hand, has uniformly fallen short of pre-pandemic trends across regions. Businesses have shown less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties regarding geoeconomic fragmentation. Higher leverage has further dampened investment which remains 3 percent to 10 percent lower across regions than had been projected before the pandemic. Moreover, the pandemic, war in Ukraine, and worsening climate shocks have contributed to a reversal in decades-long poverty reduction trends. According to World Bank staff estimates, 75 million to 95 million more people were living in extreme poverty in 2022 compared with pre-pandemic estimates. Spikes in food prices and related insecurities following Russia’s invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of

catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic.

OVERVIEW OF THE INDIAN ECONOMY

India continues to show resilience against the backdrop of a challenging global environment, according to World Bank’s latest India Development Update (IDU). The IDU, the Bank’s flagship half yearly report on the Indian economy, observes that despite significant global challenges, India was one of the fastest-growing major economies in FY22/23 at 7.2%. India’s growth rate was the second highest among G20 countries and almost twice the average for emerging market economies. This resilience was underpinned by robust domestic demand, strong public infrastructure investment and a strengthening financial sector. Bank credit growth increased to 15.8% in the first quarter of FY23/24 compared with 13.3% in the first quarter of FY22/23.

The World Bank forecasts India’s GDP growth for FY23/24 to be at 6.3%. The expected moderation is mainly due to challenging external conditions and waning pent-up demand. However, service sector activity is expected to remain strong with growth of 7.4% and investment growth is also projected to remain robust at 8.9%.

“Tapping public spending that crowds in more private investments will create more favourable conditions for India to seize global opportunities in the future and thus achieve higher growth.” - Auguste Tano Kouame, World Bank’s Country Director in India.

“While the spike in headline inflation may temporarily constrain consumption, we project a moderation. Overall conditions will remain conducive for private investment,” said Dhruv Sharma, Senior Economist, World Bank, and lead author of the report. “The volume of foreign direct investment is also likely to grow in India as rebalancing of the global value chain continues.”

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of the COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second-highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Overview of Indian Textile Industry

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employ more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

Market Size

The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. India has a 4% share of the global trade in textiles and apparel.

India is the world's largest producer of cotton. Estimated production stood at 362.18 lakh bales during cotton season 2021-22. Domestic consumption for the 2021-22 cotton season is estimated to be at 338 lakh bales. Cotton production in India is projected to reach 7.2 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers.

Production of fibre in India reached 2.40 MT in FY21 (till January 2021), while for yarn, the production stood at 4,762 million kgs during the same period.

India's textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. India's textile and apparel exports to the US, its single largest market, stood at 27% of the total export value in FY22. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22.

India's textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

Indian Technical Textiles Industry

India's strengths have already been defined in traditional textiles and natural fibres globally. It is the second largest producer of polyester in the world and is now emerging as a key player in technical textiles industry contributing to a market size of \$ 19 Bn.

Technical textiles are defined as high performance textile products, materials, and fibres that are used for their functional use rather than for aesthetic purposes. Technical textiles have varied applications in several vital industries including aerospace, packaging, hazard protection, shipping, sports, agriculture, defence, healthcare, construction, etc.

The usage of technical textiles has the benefit of large-scale improvements in performance, efficiency, conservation of resources, cost reduction, environmental protection and cost effectiveness. Other terms used for defining Technical textiles include industrial textiles, functional textiles, performance textiles, engineering textiles, invisible textiles and hi-tech textiles.

Technical textiles is a fast-growing sub-segment that finds its usage in an array of sectors. The end use application of technical textiles is widespread and seen in industries such as agriculture, construction, sports apparel, healthcare etc. India's leap towards modernisation and its manufacturing competitiveness are some of the key contributors to the growth of this segment.

Technical textile accounts for approximately 13% of India's total textile and apparel market and contributes to India's GDP at 0.7%. There is a huge potential to fulfil a large demand gap as the consumption of technical textiles in India is still only at 5-10% against 30-70% in some of the advanced countries. Hence, garnering direct attention from prime minister Narendra Modi and his Cabinet Committee on Economic Affairs (CCEA), a National Technical Textiles Mission has been set up that aims at an average growth rate of 15-20% to increase the domestic market size of technical textiles to \$ 40-50 Bn by the year 2024; through market development, market promotion, international technical collaborations, investment promotions and Make in India initiative.

Technical textiles, a sunrise sector, has become even more relevant during the Covid-19 crisis when the global manufacturing have come to a grinding halt and the ban on export of critical medical equipment including N95 face masks and protective gears, have made imports to India nearly impossible. India was entirely import dependent for PPE kits. From manufacturing 0 PPE kits in March, it soon rose to manufacturing 2.5 lakh a day in 60 days becoming the second largest manufacturer after China. Today, India stands to produce around 4.5 lakh PPEs and more than 1.5 crore masks a day.

Despite the economic slowdown and downturn in the overall demand for textiles due to Covid-19, the industry continues to be the second largest employer in India. By transforming a Covid-19 crisis to an opportunity, India has proven its ability to innovate and rise to the challenge with limited resources and time. Therefore, it is even more essential for the government and industry to collaborate to boost technical textiles, a high value segment of this sector.

- ***Location Advantage***

Nestled in the industrially robust state of Gujarat, often referred to as the "Textile State of India," our strategic location provides multifaceted advantages. Gujarat's geographic proximity to ports and its status as the largest producer of polyester in India significantly reduce transportation costs, making our manufacturing processes more cost-effective. The state's well-established textile value chain ensures easy access to polyester, knitting, weaving, and manufacturing of grey cloth. This proximity also extends to the availability of chemicals, a crucial raw material for us. The competitive market for raw materials in Gujarat further allows us to procure high-quality inputs at competitive rates, contributing to our overall cost-effective production. Additionally, the state's textile-centric ecosystem provides us with a ready market for selling and distributing our products through a network of dealers, traders, and specialized manufacturers.

Our R&D facility is highly dependent upon skilled professionals. Our skilled employees help us to keep a track of the rapidly changing market to be in tune with such changes. We employ skilled, semi-skilled and unskilled labour for carrying out various processes for manufacturing fabrics and the availability of labour in abundance in India helps us to maintain our low labour costs. Therefore, the location of our manufacturing unit helps us in cutting the cost of manufacturing of our products and enables us to manufacture quality products with the help of domestic and imported raw materials and skilled labour.

- ***Quality Assurance and Quality Control of our products***

At the core of our operations is an unwavering commitment to quality assurance and control. Our customers demand rigorous quality checks at various stages before dispatch, and we have established dedicated quality assurance and control teams to meet these demands. Led by experienced officers, these teams ensure that our fabrics undergo meticulous inspections to prevent rejections and maintain eligibility for use by contract manufacturers of international brands. Our quality control measures extend from thorough checks of raw materials to the final inspection of finished goods. An in-house laboratory equipped with semi-automatic/mechanical machines, operated by skilled personnel, supplements these efforts.

With continuous efforts and expertise of our quality assurance and quality check team, we have received a certificate for the management system, ISO 9001:2015 by INTERTEK, ISO 9001:2015 which is a globally standardized, independent mark of quality, semi-finished and finished textile products from all stages of production and for all accessory materials used in the process.

Presently, we deal in a range of quality products used in manufacturing of luggage, roofing, agriculture net, vehicle cover, housing and tents, armed forces fabric and sports-kits, chairs, medical arch support, umbrella and rain coats amongst others. We specialize in manufacturing and processing of a wide range of fabrics such as, 100% polyester knitting and woven fabrics. Our initiative towards setting up a separate manufacturing unit for dyeing for our woven and knitted fabric and bags will add a new product to our portfolio and open doors for us to expand our business and operations.

- ***Government Incentives***

We are located in the state of Gujarat and enjoy the benefits of incentives under the “Technology Upgradation Fund Scheme” (TUFS) and “Amended Technology Upgradation Fund Scheme” (“ATUFS”) provided by the Central Government of India and “Gujarat Textile Policy, 2012” (the “Policy”) by the State Government of Gujarat. An interest subsidy of 6% on the loans availed by us is provided under both TUFS and the Policy.

TUFS was introduced in 1999 to catalyze investments in all the sub-sectors of textiles and jute industry by way of 6% interest reimbursement. The Ministry of Textiles, Government of India notified ATUFS in the year 2018, to promote ease of doing business, make in India and increase the employment. It facilitates augmenting investment, productivity, quality, employment and exports and increases investment in the textile industry. Taking cue from Ministry of Textiles, the Government of Gujarat promulgated the Scheme for Assistance to Strengthen Specific Sectors in the Textile Value Chain in supersession of the Policy which provides incentives such as; interest subsidy and capital subsidy. For further details in respect to TUFS, ATUFS and the Policy, please refer to the chapter titled, “*Key Industrial Regulations and Policies*” on page 127 of this Draft Red Herring Prospectus.

OUR BUSINESS STRATEGIES

Our strategic objective is to improve and consolidate our position as a major technical textile manufacturer with a continuous growth philosophy and to enter in value added products to create an integrated Yarn to end-product manufacturing set up. Below points represents our continuous growth philosophy being implemented:

- ***Setting up of new Dyeing Unit and another unit for manufacturing of bags***

Inaugurating our commercial production in July 2020 with an initial capacity of 400 kilos per day for knitting fabrics, we took significant strides towards diversification. Subsequently, recognizing the market demand and trends, we expanded our operations by establishing a dedicated PVC and EVA lamination division in April 2023. This division, equipped with an installed capacity of 15,000 meters per day, bolstered our capabilities in PVC and EVA lamination.

Looking ahead, with the proceeds from this Issue, we are poised to elevate our product portfolio even further. Our strategic plan includes the establishment of a cutting-edge dyeing facility and a forward integration initiative for the manufacturing

of bags. The proposed manufacturing facility for bags will be located at Plot No. 281 and 282, Block No. 314, Rajhans Texpa, NH 8, Palsana, Surat, Gujarat, India. This facility will be fully equipped to execute the entire spectrum of processes and procedures integral to bags manufacturing.

Simultaneously, we plan to set up a state-of-the-art dyeing facility at Block No. 501, Plot No. 8, Rajhans Zesto Phase-2, NH 8, Navsari, Surat – 396415, Gujarat. This facility will be comprehensively equipped to handle all phases of the dyeing process for fabrics.

The decision to diversify into bags manufacturing signifies our strategic move towards forward integration, allowing us to tap into a higher-margin segment. We envision crafting high-quality bags leveraging our specialized technical textile expertise. This venture aligns with the prevailing trends in sportswear, rainwear, and the broader bag pack industry. Notably, the burgeoning demand for interlining fabric in India has spurred a distinct diversification trend in the technical textile industry. This fabric variation is increasingly finding applications in luggage and sportswear manufacturing, presenting a lucrative opportunity for our foray into bags production.

- ***Diversifying and increasing penetration in markets***

We are engaged in manufacturing, processing and coating of woven fabrics for direct sale to our customers domestically. The domestic market offers various opportunities in term of sub-geographic penetration and product/ market diversification which we intend to seize and increase our market reach domestically to explore untapped markets and segments as part of our strategy to mitigate market risk and widen growth prospects. We shall continue to explore opportunities in different countries where we can supply value added products to enhance our geographical reach.

- ***Strengthen our marketing network***

We continue to enhance our business operations by ensuring that our network of customers increases through our marketing efforts. Our core competency lies in our deep understanding of our customers' buying preferences and behavior, which has helped us in achieving customer loyalty. We endeavor to continuously improve the product-mix offered to the customers as well as strive to understand and anticipate any change in the expectation of our customers towards our products. Presently, our marketing and sales division consists of 3 members who are responsible for marketing our products in the unorganized and the organized sector of the technical textile industry. We intend to strengthen our existing marketing team by inducting personnel with expertise in the industry, who will supplement our existing marketing strategies in the domestic markets. Further, we also plan to diversify our business operations from weaving, knitting and coating of fabrics and EVA & PVC lamination of fabrics to also include dyeing. Our move towards setting up a separate dyeing unit will help us add a new process line in our portfolio and therefore increase our operations and customer base.

With the use of our products by contract manufacturers of branded luggage and shoes manufacturers, our fabrics have a huge acceptability and inquiry all over India. We have already started out on our journey as a supplier of our existing products in the domestic market, by supplying products in conformity with the Indian standards, which makes the quality of our products, our biggest marketing technique. Our Domestic operations have enabled us to learn and follow the global trends, improve our efficiency, quality and trend analysis and better customer servicing, which shall in the future help us in penetrating global markets with a wide market reach.

• MANUFACTURING PROCESS

The finished fabric manufactured by us has to go through various machines and undergo a number of processes, which are detailed below.

Raw Material procurement

i) Yarn

Yarn is the most vital raw material used in our manufacturing process for both our woven and knitted fabrics. We use yarn as major input apart from machinery for processing. We procure yarn of reputed manufacturers from their local agents. We generally use yarn of Reliance, Alok, Sanatan and Garden amongst others. Our R&D team ensures that the quality of all our raw materials is maintained in order for them to help us manufacture quality fabric. Our manufacturing process ensures quality with products being passed through several processing stages, which enhance the appearance, durability and serviceability of the fabric and makes the fabric worth of targeted end use making.

ii) Chemicals

Chemicals are the 2nd most vital raw material used in our manufacturing process for both our woven and knitted fabrics. Chemicals are used in sizzing and coating of yarns. We procure chemicals of reputed manufacturers from their local agents. We generally use chemicals of Neochem, Sarex Chemicals and Archroma amongst others.

iii) Greige Fabric

Greige fabric quality is an important aspect of the textile industry. After manufacturing of Greige fabric on loom or knitting machine, we produce various kind of design as per market requirement, and we use Greige fabric as major input apart from chemicals, power and machinery for processing. Our R&D team ensures that the quality of Greige fabric is maintained in order for them to help us manufacture quality fabric. To ensure the quality of the Greige fabric, it is passed through several processing stages, which enhance the appearance, durability and serviceability of the fabric and makes the fabric worth of end use manufacturing.

iv) Grey inspection and checking

Every supply of grey cloth needs a thorough check for quality of the material. The following procedure is followed by us for checking of grey material:

- Assessment for damage incurred during transit.
- Verification of the supplied quantity.
- Examination of count, reed, and pick for woven fabrics, and courses, wales for knitted fabrics.
- Measurement of GSM and GLM of the cloth.
- Evaluation of width for woven fabrics and diameter, as well as gauge for knitted fabrics.
- Scrutiny for manufacturing defects in every meter of quantity.
- Examination for any deformities in the construction of the fabric.
- Identification of unusual cuts in the fabric.

We manufacture two types of fabrics i.e. knitted and woven, and the manufacturing process of both the fabrics are different. Based on the above-mentioned classification, below is the manufacturing process of our products:

a) Knitted Fabrics

- **Grey yarn:** An order received for dyed knitted fabrics is confirmed when the requirements of the customer or client is brought out on the fabrics by testing at laboratory'. The requirement of the order is brought out on the fabric, by dipping the fabric in dyes to confirm if the finished product will match with the requirement of the customer. Once the customer approves the sample of the finished fabric, the order is confirmed and the appropriate quantity of yarn is ordered for initiating the manufacturing process.
- **Quality Inspection:** Once the grey Yarn is received from our supplier, it is taken for quality check to our R&D facility. The said facility is run by our quality assurance and quality control department, the former carries out certain tests in our in-house laboratories to check that the international standards are met and complied with before the fabric manufacturing of knitting fabric. Additionally, in order to ensure the quality of our yarn, we outsource the services of various international labs at an interval to confirm the quality of our yarn and the reports of our in-house laboratory and quality assurance and control teams. Along with carrying out tests, our quality assurance team conducts manual checks on the yarn with the help of the machines installed the quality assurance team carries out various inspection methods and system on the yarn test for defects like unevenness, rips, strength, colour etc. Once the yarn is checked, the same is transferred to the warping section of the unit.
- **Beaming:** Once the grey yarn is inspected and approved then the beaming process start with the help of a warping machine. Once the beams are formed then the beam is then sent to knitting process.
- **Knitting:** As per the Design we will collect the set of beams and load on the Knitting Machine, Then set the design and prepare 1 Meter of the fabric for the Quality check approval at the start of production. After approval we will start for bulk production.
- **Heat set & Drying:** After bulk production the fabric is been sent for heat setting and drying in our inhouse stenter machine.
- **Dyeing:** After heat setting/Drying process, fabric is sent to outside dyeing mill for dyeing . Fabric is dyed as per the requirement of the customer. If there is any additional colour requirement for fabric, then first lab dip is made and approved from the customer. After approval, fabric is been dyed in bulk.

- **Inspection and packing:** After dyeing, fabric is sent in godown from mill for inspection. If there is any mismatch in the fabric from the customers' specification, the same is sent for re-process in mill to get it corrected and if it is not corrected, the same will be converted into black fabric and used for other customers. After inspection the same is been labeled, packed and dispatched to party.

b) *Woven Fabrics*

Grey yarn: Firstly we receives sample from customer to make the product, we make sample and send it for approval. After approval order is been placed. Based on orders and future projection yarn is been ordered to make the product.

Quality inspection (yarn): Once the grey Yarn is received from our supplier, it is taken for quality check to our R&D facility. The said facility is run by our quality assurance and quality control department, the former carries out certain tests in our in-house laboratories to check that the international standards are met and complied with before the fabric manufacturing of knitting fabric. Additionally, in order to ensure the quality of our yarn, we outsource the services of various international labs at an interval to confirm the quality of our yarn and the reports of our in-house laboratory and quality assurance and control teams. Along with carrying out tests, our quality assurance team conducts manual checks on the yarn with the help of the machines installed the quality assurance team carries out various inspection methods and system on the yarn test for defects like unevenness, rips, strength, colour etc. Once the yarn is checked, the same is transferred to the warping section of the unit.

Sizing and warping: After Yarn inspection it is been sent for sizing and warping. In sizing yarn is been passed through chemical process to gain strength so that it doesn't break while weaving and then its been sent for warping. In warping yarn is been rolled and warped in a beam for beaming process.

Beaming: As Per the design and texture of the fabric the yarn is beamed and then loaded in machine for weaving.

Weaving: Beam is loaded on machine to start the weaving process. Initial sample is been collected from weaving for inspection process. After inspection and approval bulk production is weaved.

Greige inspection: once the fabric is been weaved it is sent for inspection process. After Inspection the fabric is sent for dyeing. And if found any defect in inspection it will be holded aside

Pre-treatment/washing: Once the greige is ready it is sent for pre-treatment i.e. washing. After washing it is been sent for dyeing.

Dyeing: As per colour requirement of the customer, the greige is sent to outside dyeing mill for dye. Fabric is dyed as per the requirement of the customer. If there is any additional colour requirement for fabric, then first lab dip is made and approved from the customer. After approval, fabric is been dyed in bulk. As per requirement of the party we supply dyed goods to them after inspecting or it goes to coating/printing depending upon the customers requirement.

Coating and Printing: After dyeing as per customers' specification, the Fabric is sent for coating and printing. We have different types of coating to offer to our customers according to their requirement, including AF coating, PU coating, WR coating, WP coating, EVA and PVC lamination etc. After coating, the fabric is inspected and dispatch to party or it might be sent for printing according to customers' requirement. We also offer different types of printing to our customers like screen print, mill print and digital print.

Inspection and packing: After dyeing, coating, or printing the fabric is been inspected and if found any defect its been returned for re-process to get it corrected and dispatch the same to party. After inspecting the fabric, it is passed through the roll packing machine to form rolls after which the finished fabric is packed in shrink wrap with the help of shrink wrapping machine, details of the fabric such as lot number, roll number, etc. are placed on the rolls which are then finally dispatched.

Quality control and tests at each stage at the manufacturing process:

Our quality team is responsible for the checking and supervising of test like strength, count strength product (CSP), Denier and colour, seam strength, tear, peel off, stiffness of coated fabric and visual defects, and responsible for the checking and supervising of productions like weaving, knitting, coating, embossing and lamination process of production shall be strictly controlled and checked or maintain the quality of every stage of production The knitted and woven fabrics are inspected at various stages starting from raw material inspecting, fabric processing and fabric finishing, the details of which have been provided below:

(c) All liabilities other than current liabilities shall be classified as non-current.

D. PROPERTY, PLANT & EQUIPMENT

Items of property, plant and equipment are measured at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment comprises: (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; (b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other cost directly attributable to bringing the item to working condition for its intended use.

The cost of improvements to leasehold premises, if recognition criteria are met, are capitalized and disclosed separately under leasehold improvement.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal and retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset is recognized in Statement of profit and loss.

Subsequent cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Company and the cost of the item can be measured reliably. All other subsequent cost are charged to Statement of profit and loss at the time of incurrence.

Depreciation

Depreciation on PPE is provided on the Straight-Line method computed on the basis of useful life prescribed in Schedule II to the Companies Act, 2013 ('Schedule II') on a pro-rata basis from the date the asset is ready to put to use.

The residual values, useful lives and methods of depreciation of property plant and equipment are reviewed by management at each reporting date and adjusted prospectively, as appropriate.

Amortization of Intangible Assets

The intangible assets having a definite life are amortized over the life of the asset.

E. INVENTORIES

Inventories of finished goods are valued at cost or net realizable value ('NRV'), whichever is lower. Costs of inventories has been determined using weighted average cost method and comprise all costs of purchase after deducting non-refundable rebates and discounts and all other costs incurred in bringing the inventories to their present location and condition. Provision is made for items which are not likely to be consumed and other anticipated losses wherever considered necessary. The comparison of cost and NRV for traded goods is made on at item Company level basis at each reporting date. However, there is no inventory of any products.

F. LEASES

Lease payments in respect of assets taken on operating lease are charged to the Statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with the expected general inflation to compensate the lessor's expected inflationary cost increases, if any. However, there is no lease payments during the period under consideration.

G. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is

suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred.

H. IMPAIRMENT OF ASSETS

At each reporting date, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication of impairment exists, then the asset's recoverable amount is estimated. For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash generating units ('CGU').

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognized in the Statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU and then to reduce the carrying amounts of the other assets in the CGU on a pro-rata basis.

For other assets, an impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized

I. PROVISIONS AND CONTINGENT LIABILITIES AND ASSETS

Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities

Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

J. EMPLOYEE BENEFITS

Employee benefit liabilities such as salaries, wages and bonus, etc. that are expected to be settled wholly within twelve months after the end of the reporting period in which the employees render the related service are recognized in respect of employee's services up to the end of the reporting period and are measured at an undiscounted amount expected to be paid when the liabilities are settled. Gratuity has been calculated based on date of joining as 11th April 2023 which is the date of incorporation of the company for all the employees.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

- d) SEBI pursuant to its circular bearing reference number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 has reduced the time taken for listing of specified securities after the closure of public issue to 3 working days (T+3 days) as against the present requirement of 6 working days (T+6 days); ‘T’ being issue closing date. The provisions of this circular shall be applicable, on voluntary basis for public issues opening on or after September 1, 2023 and on mandatory basis for public issues opening on or after December 1, 2023. Our Company shall follow the timeline provided under the aforementioned circular.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue, it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Anchor Investors are not allowed to withdraw their Bids after Anchor Investors bidding date.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular. The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to *inter-alia*, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, *inter-alia* with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
